SUBJECT:

Appreciation of the Value of DD/P Controlled
Ground Photography at the U.S. Navy Photo-
graphic Interpretation Center

1. During the course of two weeks training duty at the USN-
PIC I had the opportunity to review the operations of many analysts
in many departments. I was interested particularly in the fine
work the Navy is doing [REDACTED]

2. The Navy chief analyst on this program, [REDACTED]
freely volunteered the information that Navy PIC was particularly
indebted to CIA for this kind of photography. In fact, the CIA
sources appear to be supplying not only a greater volume but a
better quality than the Navy sources. [REDACTED]

3. I would like to add my own commendation of your efforts
and hope that you would extend Navy's as well as NPIC's apprecia-
tion to those responsible elements under your control.
